DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

Group **1**, claims **88-135** are drawn to a semiconductor device having a transistor, a gate oxide arranged between gate and substrate, and a cell plate separated from gate by predetermined distance, etc.;

Group **2**, claims **136-168** are drawn to a semiconductor device having plurality of bit line pairs including first bit line and second bit line, plurality of word lines, etc..., plurality of word lines..., and first plurality of multiplexers in communication with two adjacent bit lines within one of first and second arrays.;

Group **3**, claims **169-198** are drawn to a semiconductor device comprising plurality of bit line pairs..., plurality of word lines..., a first interconnect layer and a second interconnect layer, wherein each bit line is associated with both first and second interconnect layers, plurality of memory cells..., and a plurality of amplifiers, wherein each amplifier is in communication with a first bit line and second bit line within a bit line pair.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Art Unit: 2818

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Viet Q Nguyen whose telephone number is (571) 272-1788. The examiner can normally be reached on 7am-6pm (EST).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Nelms can be reached on (703) 308-4910. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
